To find out more, see the Info•Action advertisement on p. 71 for information on how to access the suppliers' products featured here via impressionsmag.com

Childrenswear Stabilizer

EMB 200 childrenswear stabilizer from **Cotswold Industries** is made of soft, melt-blown 100% polypropylene and ensures that wearers, specifically infants and children, never know it's there, according to the company. It is embossed with perforated holes for multidirectional stability and is washable, dry-cleanable and inherently fire retardant.

Tough Transfer

Insta Graphic Systems recently introduced Tufrans II, a solvent-free, CPSIA-compliant heat transfer that is ideal for a variety of fabrics, including "hard-to-apply-to" substrates. Its low-application temperature (260°F) makes it ideal for branding on heat-sensitive, industrial substrates like nylon denier, leather, faux leather, suede, molded neoprene, cotton and cotton blends, according to the company.

Performance Polo

All of **A4's** performance polo styles offer the technical benefits of moisture management, odor resistance and stain resistance. Available in a minimum of six colors, all styles are in stock and priced less than \$10. A4's embroidery, heat transfer and screen printing capabilities make it a great single-invoice solution for your performance polo needs, according to the company.
