

## Large format printer

Digital HeatFX releases the new Diamond Business in a Box package which, according to company literature, includes the world's first large format white toner printer. The printer is said to be capable of decorating light and dark garments, hard surfaces and a variety other textiles. The Diamond Business in a Box package is reportedly easy to learn, with minimal mess and maintenance issues found in comparable decorating methods.

## Spot cleaning supplies

XpresScreen Inc. offers a line of spot-cleaning products. The Target TG-300 cleaning gun has a pump design system which is said to allow for more concentrated fluid from the nozzle, without actually consuming more fluid. The TS-3 Cleaning Fluid is suitable for removal of cured plastisol inks, water-based inks, and puff and flock adhesives. The products can be purchased individually or in a complete kit with cleaning gun, cleaning fluid and scorch remover.

## Direct-to-substrate printer

The LogoJET PRO H4 is a light industrial direct-to-substrate printer that uses fast drying solvent inks to print on a variety of substrates. With reportedly no pre-treatment required, the printer is suitable for in-house printing of promotional items. Removable product trays are available for many standard product models as well as optional custom configurations that enable customization of the items of choice.
